Platform architecture, integration and AI-assisted delivery for international brands.

A platform only works when it fits with every system already around it. That's my job. At Deloitte Digital I design the architecture and the integrations, get them live in EMEA and US markets and govern the releases after go-live.

18
Years building software

6
Years as technical architect

EXPERIENCE

Manager, Technical Architect · Deloitte Digital · Milan, Italy — Oct 2023 – present

Lead architect on commerce programmes for international brands, from architecture to go-live and run, and on bringing AI agents into the way the teams deliver.

- Designed and introduced an AI-assisted delivery workflow: specialised agents for unit tests, log analysis and code review, reusable skills and MCP servers for authorised tools, built into the team's day-to-day work.
- Designed the platform architecture and its ERP and CRM integrations for an Italian premium consumer brand's direct-to-consumer business across EMEA and US markets.
- Led technical delivery of a new commerce platform for a leading European specialist e-retailer: large multi-brand catalogue, high-volume order flows, distributed team.
- Defined a multi-brand, multi-country platform for a global manufacturer's European markets: one shared core, releases governed across instances.
- Run architecture reviews, estimates and technical risk across programmes; mentor the technical leads.

Lead Technical Architect · Alpenite s.r.l · Venice, Italy — Dec 2022 – Oct 2023

- Led the architecture team on Salesforce B2C Commerce projects for retail and consumer brands.
- Set the team standards for integrations, CI/CD and code quality.
- Reference architect in pre-sales: solution design, effort estimation and technical due diligence.

Technical Architect · Alpenite s.r.l · Venice, Italy — Mar 2020 – Dec 2022

- Designed and delivered Salesforce Commerce Cloud platforms for international retail and consumer brands: multi-site storefronts integrated with ERP, PIM, OMS, payment and logistics services.
- Introduced CI/CD pipelines and automated quality gates across the delivery teams.

Full-Stack Developer · Previnet s.p.a · Treviso, Italy — May 2016 – Mar 2020

Full-Stack Developer & System Administrator · Pellegrini s.p.a · Venice, Italy — Aug 2008 – Apr 2016

AI IN DELIVERY

- Designed an AI-assisted development flow for the delivery teams' repositories: shared repository instructions (AGENTS.md), specialised agents, reusable skills and MCP servers for authorised tools, with least-privilege access to the team's tools.
- Specialised agents for unit test generation, read-only log analysis, Figma-to-component work and pull request review support.

SKILLS

Integration of complex platforms · AI agents & MCP · AI-assisted development (Claude Code, GitHub Copilot) · API orchestration · Composable & headless architecture · Integration with back-end systems (ERP, CRM, PIM, OMS) · Agent skills & repository instructions · Salesforce Commerce Cloud · CI / CD · Delivery governance · Stakeholder management · Team leadership & mentoring

Certifications

- Salesforce B2C Commerce Architect
- Salesforce B2C Commerce Developer
