PROFILE

Senior Tech Architect with 15+ years of experience in digital consulting, specialising in composable architectures and the integration of complex digital platforms. Strong focus on delivery governance, scalability and the long-term sustainability of technical solutions.

Proven track record in technical leadership, end-to-end ownership and cross-functional stakeholder management: leading cross-functional teams, managing distributed delivery and owning the full lifecycle of enterprise initiatives.

BEYOND WORK

Passionate about outdoor activities and an active lifestyle: running, hiking, skiing and road travel. I enjoy exploring Europe by camper van, appreciating nature, minimalism and slow living. Interested in how technology can support focus, simplify workflows and enable a healthier work-life balance.
