PROFILE

Senior Tech Architect with 18 years in software, the last six spent designing and delivering composable commerce platforms for international consumer brands. I own solutions end to end: architecture, integration of complex platforms, delivery governance and the teams that build them. Before commerce, I built platforms for the insurance and pension sector.

EXPERIENCE

Manager, B2C E-commerce and Technical Architect

Oct 2023 – present

Deloitte Digital · Milan, Italy

Lead architect for the B2C commerce programmes of international consumer brands, from architecture to go-live and run.

- Designed the composable commerce architecture for a premium coffee brand's direct-to-consumer platform across European markets: Salesforce B2C Commerce, headless CMS and an API orchestration layer towards ERP, CRM and subscription services.
- Led the technical delivery of a new e-commerce platform for a leading online coffee retailer, with a large multi-brand catalogue, high-volume order flows and a distributed delivery team.
- Defined the multi-brand, multi-country platform architecture for a global home appliances group, aligning regional teams on a shared core and governing releases across realms.
- Run architecture reviews, estimates and technical risk management across the programmes, and mentor the technical leads.

Lead Technical Architect

Dec 2022 – Oct 2023

Alpenite s.r.l · Venice, Italy

- Led the architecture team on Salesforce B2C Commerce projects for retail and consumer brands, setting the standards for integrations, CI/CD and code quality.
- Reference architect in pre-sales: solution design, effort estimation and technical due diligence.

Technical Architect

Mar 2020 – Dec 2022

Alpenite s.r.l · Venice, Italy

- Designed and delivered B2C commerce platforms on Salesforce Commerce Cloud: multi-site storefronts and integrations with ERP, PIM, OMS, payment and logistics services.
- Introduced CI/CD pipelines and automated quality gates across the delivery teams.

EXPERIENCE (CONTINUED)

Full-Stack Developer

May 2016 – Mar 2020

Previnet s.p.a · Treviso, Italy

- Built and maintained web platforms for insurance and pension providers: customer and policy portals, back-office tools and integrations with core systems, in a regulated, high-reliability context.

Full-Stack Developer & System Administrator

Aug 2008 – Apr 2016

Pellegrini s.p.a · Venice, Italy

- Developed internal business applications and ran the company infrastructure: servers, networking, backups and security.
